DIAGRAMAS DE CLASE

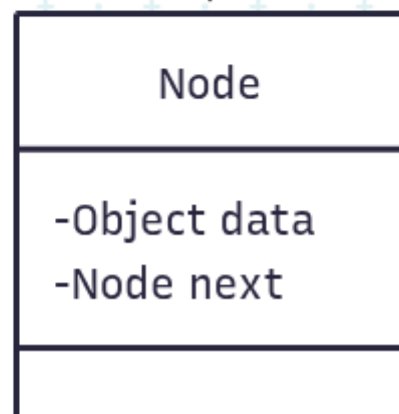

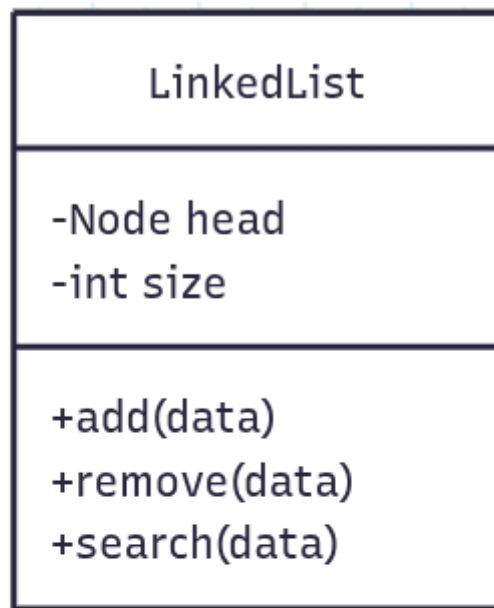

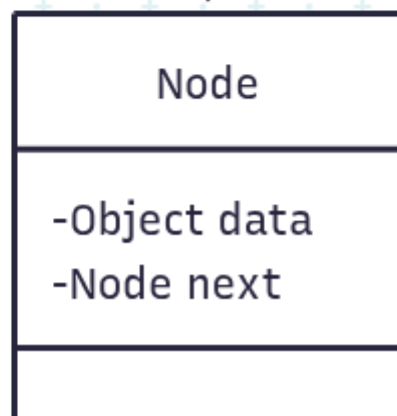

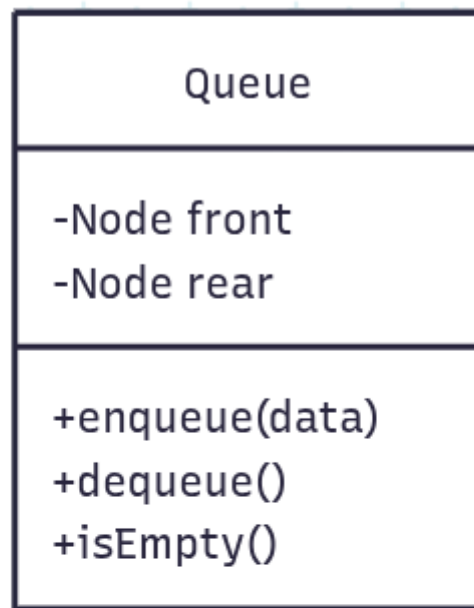

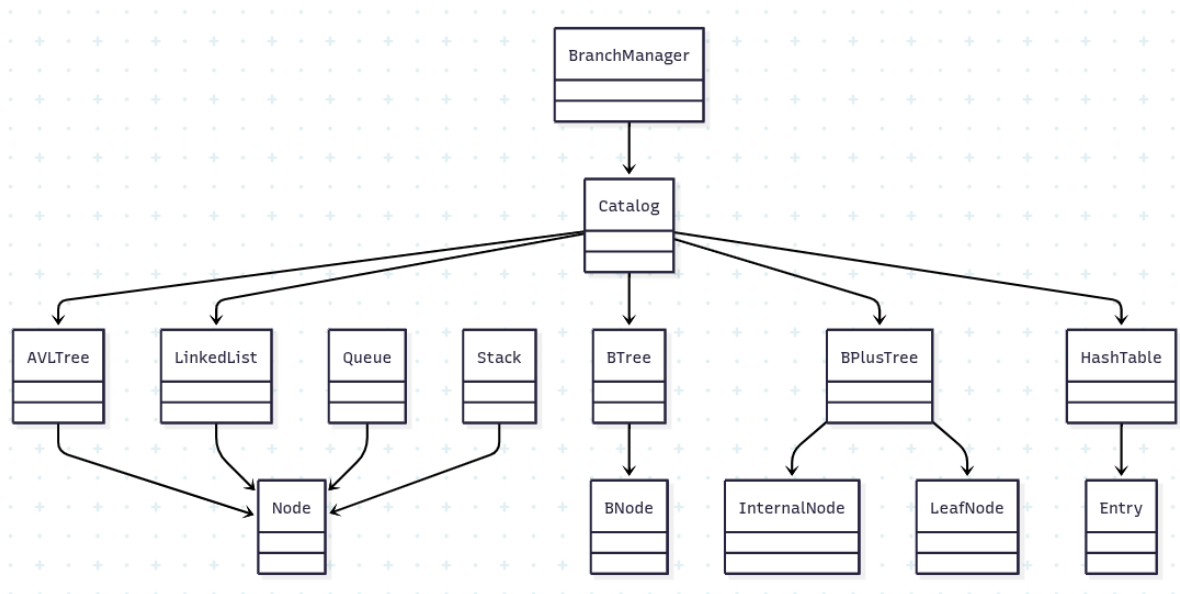

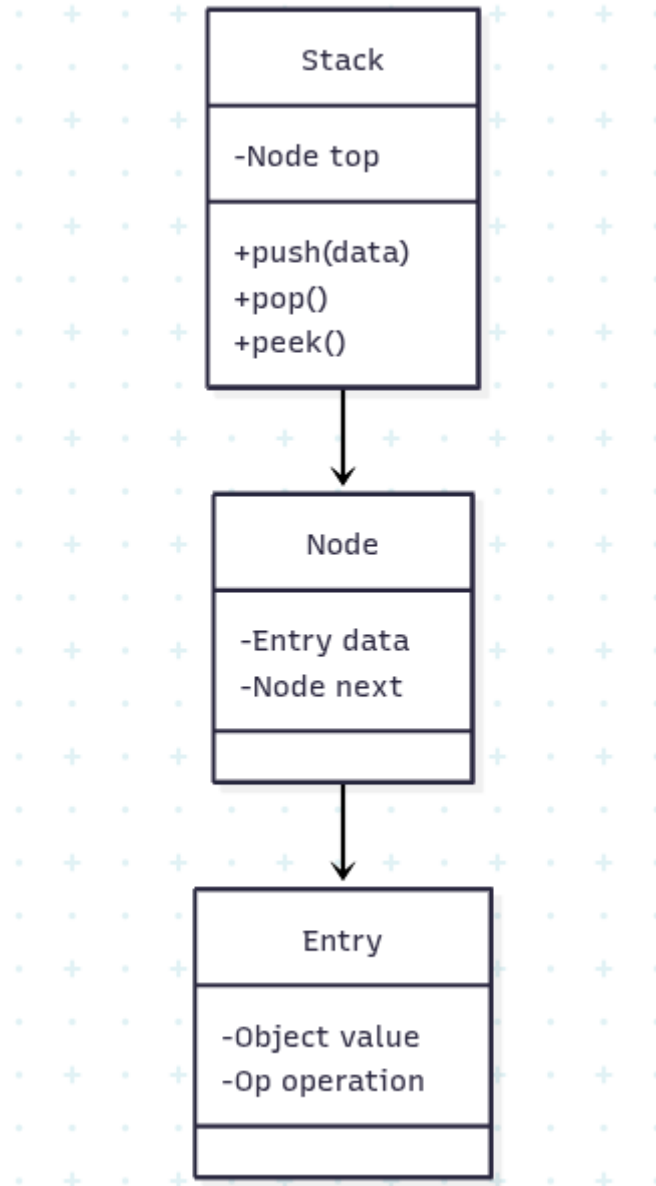

BranchManager	
BranchManager ()	
graph	BranchGraph
dispatcher	Dispatcher
transfers	List<Transfer>
addBranch(Branch)	void
getBranch(String)	Branch
searchByBarcode (String, String)	Product
removeBranch(String)	void
initiateTransfer (String, String, String, Criterion)	Transfer
getCatalog (String)	Catalog
undoLastOperation (String)	boolean
addConnection (String, String, double, double, boolean)	void
addProduct (String, Product)	boolean
searchGlobal (String)	Map<String, Product>
removeProduct (String, String)	boolean
totalProducts()	int
searchByName (String, String)	Product
allCatalogs	Map<String, Catalog>
transfers	List<Transfer>
graph	BranchGraph
allBranches	Collection<Branch>
dispatcher	Dispatcher

Catalog	
Catalog(String)	
branchId	String
unsortedList	LinkedList
undoStack	Stack
removeProduct(String)	boolean
undo()	boolean
searchByName (String)	Product
allProducts()	List<Product>
searchByExpiryRange (String, String)	List<Product>
searchByCategory (String)	List<Product>
size()	int
searchByBarcode (String)	Product
listByName (Consumer<Product>)	void
addProduct(Product)	boolean
unsortedList	LinkedList
branchId	String
BPlusTree	BPlusTree
AVL	AVLTree
hash	HashTable
empty	boolean
BTree	BTree
undoStack	Stack

MainApp	
main(String [])	void
buildHeader ()	HBox
tab(String, Node)	Tab
start (Stage)	void

TransferView		
buildRight()	Node	
initStateTransfer()	void	
combo()	ComboBox<String>	
build()	Node	
styleCombo(ComboBox<?>)	void	
infoLabel(String)	Label	
refreshQueues()	void	
alert(String)	void	
btn(String, String)	Button	
log(String)	void	
buildLeft()	Node	
previewRoute()	void	
queueVBox(String, int)	VBox	
lbl(String)	Label	
criterion()	Criterion	
field(String)	TextField	
refreshCombo()	void	
icol(String, int, Function<Transfer, T>)	TableColumn<Transfer, T>	

TreeView_		
drawBPlus(Object, double, double, double, int)	void	
applyZoom(double)	void	
toolBtn(String, String)	Button	
buildContent()	Node	
tryGraphviz(String, String)	boolean	
buildToolBar()	HBox	
refresh()	void	
info(String)	void	
drawHashTable(HashTable)	void	
drawAVL(Node, double, double, double, int)	void	
exportDot()	void	
exportImage(String)	void	
saveCanvasAsImage(String, String)	void	
refreshBranchCombo()	void	
clearCanvas()	void	
build()	Node	
drawBTree(BNode, double, double, double, int)	void	
alert(String)	void	
exportAll()	void	

DashboardView		
onDataLoaded	Runnable	
statCard(String, Label)	VBox	
refreshStats()	void	
buildCSVPane()	TitledPane	
actionBtn(String, String)	Button	
lbl(String)	Label	
log(String)	void	
build()	Node	
notifyLoaded()	void	
field(String)	TextField	
pickBtn(String, TextField)	Button	
onDataLoaded	Runnable	

ProductView	BranchView
<code>clearForm()</code>	<code>refreshConnCombos()</code>
<code>onUndo()</code>	<code>field(String)</code>
<code>btn(String, String)</code>	<code>alert(String)</code>
<code>searchByBarcode()</code>	<code>onAdd()</code>
<code>buildTablePanel()</code>	<code>buildConnectionPanel()</code>
<code>refreshTable()</code>	<code>colIn(String, String, Int)</code>
<code>status(String)</code>	<code>fillForm(Branch)</code>
<code>onDelete()</code>	<code>btn(String, String)</code>
<code>miniField(String)</code>	<code>buildTable()</code>
<code>buildSidePanel()</code>	<code>onDelete()</code>
<code>fillForm(Product)</code>	<code>styleCombo(ComboBox<String>)</code>
<code>searchByRange()</code>	<code>refresh()</code>
<code>alert(String)</code>	<code>clearForm()</code>
<code>refreshBranchCombo()</code>	<code>col(String, String, Int)</code>
<code>searchByCategory()</code>	<code>build()</code>
<code>selectedBranch()</code>	<code>buildForm()</code>
<code>lbl(String)</code>	<code>onEdit()</code>
<code>build()</code>	<code>refreshConnections()</code>
<code>buildTopBar()</code>	<code>onDeleteConnection()</code>
<code>fromForm()</code>	<code>fromForm()</code>
<code>searchByName()</code>	<code>lbl(String)</code>
<code>col(String, String, Int)</code>	<code>onAddConnection()</code>
<code>onAdd()</code>	<code>edgeCol(String, Function<Edge, String>, Int)</code>
<code>field(String)</code>	

BenchmarkView	
alert(String)	void
buildBigOPane()	TitledPane
wrapScrolled(Node)	ScrollPane
bench(Runnable)	double
refreshCombo()	void
drawChart()	void
clearChart()	void
build()	Node
benchOnce(Runnable)	double
printRow(StringBuilder, String, double, String)	void
runBenchmark()	void

GraphView	
exportImage(String)	void
tryGraphviz(String, String)	boolean
drawArrow(double, double, double, double, boolean)	void
exportDot()	void
isOnRoute(String, String)	boolean
buildToolBar()	HBox
isInTransit(String)	boolean
highlightRoute(List<String>, String)	void
draw()	void
layoutNodes()	void
build()	Node
refreshQueues()	void
updateStats()	void
